Introduction

HSG Heavy Industries has more than 2 decades of experience on various industrial fields such as Off-shore blocks, LNG containment system and Special Handling Facilities from its establishment in 1989. HSG has been grown up to responsible company with better quality with satisfactory delivery condition, High rate of repeat order from the client is reflecting the fact.

HSG has successful records of Cutting and Bending of High Wall thickness and Machining of Bulky sized blocks with its facilities and experts. As HSG located in Central side of National industrial complex, have got high flexibility of further extension on capacity and manpower sources.

The whole family of HSG will do our best to use past experience, maintain the sense of responsibility and become better partner for existing and potential clients.

Thank you.
